

BW 116

High-performance abrasive paper

Product Benefits

- High-performance aluminum oxide abrasive grain means longer tool life
- Coating with active ingredient Procut prevents workpiece surface overheating
- Less distortion especially when grinding thin stainless steel sheets (thickness: < 1 mm)

Applications

- Mechanical finish grinding of stainless steel sheets and coils with long belt and wide belt grinding machines
- Decorative surface grinding of metal housings for example in equipment and vessels construction

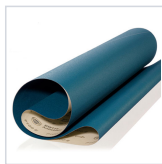

Product Structure

Type	11600
Grain	Aluminum oxide
Bonding	Resin, with active additives
Backing	F-weight paper
Coating	closed
Grit range	P 60 - P 320, P 400

Forms of Delivery

Abrasive belts

Wide belts

Metal

Wood

Lacquer

Composite

Glass and Ceramics

Stone

- Very suitable
- Suitable
- Not suitable
