

CN 466 X-flex

Flexible abrasive cloth with additives

Product Benefits

- Highly economical due to low overall grinding costs
- Ductile and sharp ceramic abrasive grain provides high stock removal rates
- Low grinding temperature due to the additional Procut coating
- Flexible cotton cloth backing guarantees a high adaptability to contours

Applications

- High-performance grinding of contoured workpieces
- Deburring of sharp-edged castings and stampings out of stainless steel and tool steel on stationary or hand-held grinding machines
- Suitable for automatic or manual grinding

Product Structure

Type	46670
Grain	Ceramic grain
Bonding	Resin, with active additives
Backing	X-flex cloth
Coating	closed
Grit range	+ 60 - + 240

Forms of Delivery

Abrasive belts

Metal Wood Lacquer

Composite Glass and Ceramics Stone

- Very suitable
- Suitable
- Not suitable
