

CN 466 Z

Heavy duty and stiff abrasive cloth with additives

Product Benefits

- Highly economical due to low overall grinding costs
- Hard and sharp ceramic grain provides high stock removal rate and long tool life
- Very good grit adhesion even at high grinding pressure in the centre as well as on the edges
- Stiff, highly tear-resistant and waterproof Z-Polyester backing assures an optimal belt stability
- Additional Procut-Coating for "cool" grinding

Applications

- High-performance grinding of all metals, especially corrosion- and acid-resistant stainless steels and tool steels
- Economical grinding of forgings, blanks and castings
- Recommended for dry applications
- Suitable for grinding operations with high pressure

Product Structure

Type	46640
Grain	Ceramic grain
Bonding	Resin, with active additives
Backing	Z-cloth
Coating	closed
Grit range	+ 24, + 36 - + 80

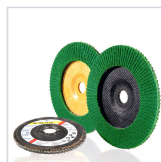

Forms of Delivery

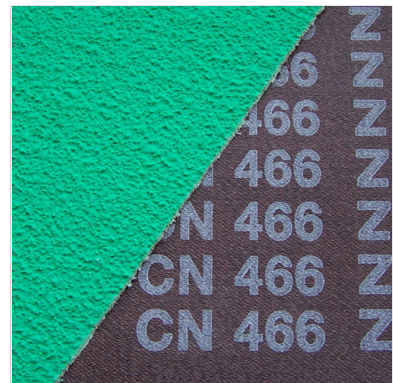

Abrasive belts

Wide belts

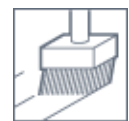

Flap discs

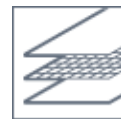

Metal

Wood

Lacquer

Composite

Glass and Ceramics

Stone

- Very suitable
- Suitable
- Not suitable
