

CERAMIT CR 456 fibre-Procut

High-performance fibre discs for grinding stainless steel and high-alloyed steels

Product Benefits

- High stock removal and sufficient economical costs provided by tough and sharp ceramic grain
- Additional Procut coating for cool grinding
- Especially suitable for grinding high-alloyed steels, e.g. Ni based alloy

Applications

- Additional Procut coating for cool grinding
- Grinding welding seams
- Deburring
- Contour and flat grinding

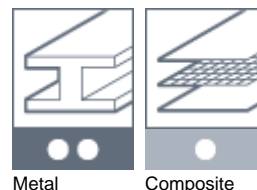

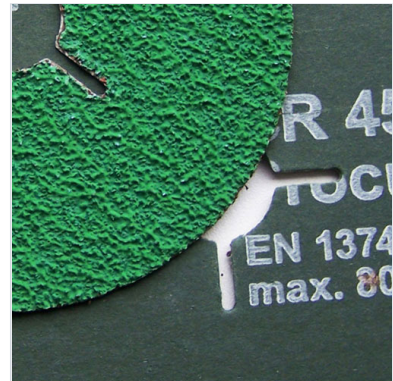

Product Structure

Type	45650
Grain	Ceramic grain
Bonding	Resin, coated with additives
Backing	Vulcanized fiber
Coating	closed
Grit range	+ 36, + 50 - + 120

Forms of Delivery

Fiber discs

- Very suitable
- Suitable
