

# HERMESIT RB 530 J

Flexible abrasive cloth with HERMESIT grain including aluminium oxide

## Product Benefits

- Three-dimensional HERMESIT grain structure means 3-5 times longer tool life and thus greater economy and productivity compared to conventional grinding belts (shorter machine setup times, lower material and disposal costs)
- Consistent roughness values and stock removal rate throughout the whole of service life result in a high degree of process stability
- Especially suitable for applications at low grinding pressure
- Flexible cloth backing means very good adaptability to workpiece contours

## Applications

- Shaping on stationary portable belt grinders or with automatic workpiece guidance
- Shaping of forged and cast metal components
- Only suitable for dry-grinding

Metal Wood Lacquer

Composite Glass and Ceramics Stone

- Very suitable
- Suitable
- Not suitable

## Product Structure

Type	53000
Grain	HERMESIT Aluminium oxide (coated carrier spheres)
Bonding	Resin
Backing	J-cloth
Coating	Special
Grit range	P 120 - P 150

## Forms of Delivery

Abrasive belts
