

RB 346 J-flex

Highly flexible aluminum oxide abrasive cloth

Product Benefits

- Excellent adaptability to contoured workpieces and radii
- Suitable for intricate profiles and small radii.
- The high strength bonding system prevents a premature abrasive grain shedding
- Improved abrasive life
- Higher stock removal

Applications

- Profile grinding with belts on automatic and off-hand machines with manual workpiece transportation
- Manual grinding with rolls and sheets for high-performance applications
- Suitable for grinding shapes, outlines, profiles and radii
- Grinding of brass, tool steel, zinc castings, aluminum alloys, stainless steel

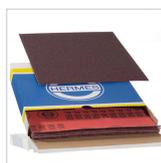

Product Structure

Type	34660
Grain	Aluminum oxide
Bonding	Resin
Backing	J-flex cloth
Coating	closed
Grit range	P 40 - P 400, P 600

Forms of Delivery

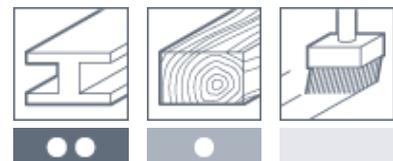

Rolls

Sheets 230 x 280 mm

Abrasive belts

Metal Wood Lacquer

Composite Glass and Ceramics Stone

- Very suitable
- Suitable
- Not suitable
